## Notice to SFI Member and Affiliate Sanctioning Bodies

### Misprinted SFI 16.1 Labels for seatbelt harnesses

Recently it was discovered that some SFI Spec 16.1 compliance labels which contained a printing error from our vendor were mistakenly issued to some of our manufacturers. The lot of defective labels was identified and recalled by SFI. However, a small quantity was already installed on some products and subsequently distributed by two (2) manufacturers before the error was found. The misprinted labels contain an incorrect validity date of "June 30, 2019" shown below the larger "DEC 2019" date. The printing error is shown here:

This Notice is to confirm that any Crow Enterprizes or RJS Safety Equipment brand seatbelt products with these misprinted labels affixed to them are in fact valid until December 31, 2019. Please notify your technical inspectors that if they identify these labels in the field, the products are acceptable to be used until December 31, 2019. If there are any questions, please contact the SFI office.
